Ref: Proposed rule 16 CFR Part 437
Business Opportunity Rule

Date: 7/17/2006

Hello this is Gary Smith and I am a Network Marketer with Nutronix International and I am writing this letter today to express my opinions and share with you the negative impact this proposed bill will and already is having on my home based business. I will keep this short for you.

This proposed rule has already scared off several potential business builders from joining in my business in just the last two days since we have learned about the proposed rule. When these prospects hear that new potential business partners will have to wait up to 7 days before joining and also disclose all their private information they realize that the growth and their ability recruit new members will be nil; therefore, do not join.

I have worked hard at building my business over the last 15 months and will achieve 2star status by month end. This is the second level from the top. I am most proud of the other 25 or so I have been able to help achieve various prestigious levels within the compensation plan. All these people are earning between \$350.00 & \$2,500.00 per month and their commissions continue to increase. Many more people are reaching these levels every month. This is a people helping people business.

Network marketing is the only business I know of where anyone can succeed, no matter where they are economically. All it takes is consistent action and hard work.

I know there is a tremendous amount of revenue generated for the US by all the products sold. Not to mention all the revenue generated from many other sources tape sales, computers, conventions & internet commerce.

In closing I will say that America is the land of opportunity and dreams you just have to go after it, please don't take or make it so difficult where the average person will not be able to participate in the best business for an entrepreneur.

I have invested a great amount of time and money building this business so I can retire from my regular job at the end of this year. Please don't take that dream from me or the many others who feel this is their only way to have a quality life.

Punish the bad guys but please don't punish all of us for the actions of a few.
From USA – the land of opportunity.

Thank you - A silent majority person
Gary Smith
